Context
Recognizes the bungalow scale which dominates Eastern Portland, providing a single-story presence along the street front, three stories in the middle of the site and returning to the two-story single-family scale at the rear (diagram above)

Pedestrian / Vehicular Allocation
Treating the car as the occasional visitor, the shared court is designed to function as a multivalent space for varied activities, supporting pedestrians first. Paved, planted, lawn and drivable turf areas allow a range of uses (right diagram)
